

Headers J1A and J1B support daughter card;
components between headers are height-limited
to less than 11mm.

SMA connector J9 projects over edge of PCB.

Connectors J3, J4, J5 and J6 are optional.

Position of pin 1 on ICs indicated with a dot.
Diode and capacitor polarities are indicated by
a bar on cathode.

Please note: connector J8 is not symmetrical;
ensure signal pin is located as marked.

Mount crystal X1 vertically; do not force.
Secure to PCB or side of J1A using adhesive if
preferred. Observe handling and soldering
precautions as indicated on Citizen website.

F1, F2 and F3 are 1mm fiducial markers.
